

# ALLER-RESPONSE™

With Activated Quercetin™, Ginkgo and Synephrine

Seasonal changes don't need to send you running for cover. **ALLER-RESPONSE** is a comprehensive formula designed to modulate immune system response. It supports multiple body systems such as immunity, histamine regulation, adrenal stress response, mucous membranes, and prostaglandin metabolism.

	Histamine Response	Immune Support	Clearing, Soothing & Tonifying	Prostaglandin Metabolism	Stress Response: Adrenal Support
ACTION	<p>Aller-Response contains plant constituents that <b>modify the release of histamine</b>. Human cell culture studies with quercetin have demonstrated its ability to inhibit the release of histamine from immune cells. Ginkgo inhibits Platelet-Activating Factor, which stimulates histamine secretion from platelets.</p>	<p>Establishing appropriate immune response is critical for seasonal health. These essential nutrients provide <b>support for key components of the immune system, such as mucous membrane integrity, cell-mediated immunity</b>, and antioxidant activity.</p>	<p>The <b>clearing and soothing of mucous membranes in the nasal passages, throat and lungs</b> is an important part of seasonal health. These natural compounds assist in this process.</p>	<p>Prostaglandins, leukotrienes and thromboxanes are short-lived regulatory messenger molecules. They help regulate many body functions, including vasodilation and vasoconstriction, and smooth muscle contraction. Certain prostaglandins have a soothing quality and help the body <b>maintain a state of comfort</b>. Bromelain and quercetin have a beneficial influence on prostaglandin metabolism.</p>	<p>The adrenal glands <b>produce hormones, such as cortisol, that enable our bodies to respond to stress</b>. Supporting the adrenal glands is important for the body's response to seasonal stress.</p>
CONTENT	Ginkgo, Quercetin	Zinc, Vitamins A, B-6, B-12 & C	Bromelain, Licorice, Long Pepper, MSM, Nettle, Synephrine, Vitamins A & B-12	Bromelain, Quercetin, Vitamin B-6	Licorice, Magnesium, Vitamins B-6 & C, Pantothenic Acid
