# NUTRASPRAY™

*The Super Sublingual™*

*NUTRASPRAY represents a quantum leap in the evolution of supplementation, an elegant combination of convenience, fast action, bioavailability, and sustained release delivery. Source Naturals has long championed the sublingual delivery system, and our Super Sublingual™ is the latest step in the science of nutrition.*

*A quick spritz of NUTRASPRAY under the tongue delivers thousands of microscopic lipid spheres, each full of nutrients. These lipospheres are readily absorbed and retained by the mucosal tissue of the mouth. Here they release their nutrients quickly, but steadily, into the bloodstream – creating a Super Sublingual, the most bioavailable supplement today.*

**N**utrient delivery systems include tablets, capsules, softgels, and liquid extracts. Their purpose is to ensure the cells in your body get the nutrients they need from the supplements you take. Sublinguals bypass the digestive system – and its potentially destructive juices – by dissolving under the tongue to be directly absorbed into the bloodstream. Tests show that the NUTRASPRAY liposome sublingual delivery system is more efficient than traditional sublinguals.

### The First Timed Release Sublingual

Due to the multi-layered structure of the tiny liposomes, nutrients are gradually released for extended periods of time, maintaining optimal dosage throughout the day or night. This combined with a faster onset of the active ingredients – usually within 15 minutes – makes NUTRASPRAY the most bioavailable delivery system for nutritional supplements today, and the first truly timed release sublingual.

### Unparalleled Convenience

NUTRASPRAY incorporates a simple, non-aerosol spray pump that's easily carried in purse or pocket. Its modern functional design is a perfect complement to today's active lifestyle. It's easy to regulate nutrient amount, because the convenient pump delivers a specific amount of nutrient-rich liposomes with every spray, and each 2 fl. oz. recyclable plastic bottle can deliver 80 full sprays. *Stevia* is added as an ingredient in each NUTRASPRAY product.

### Advanced Research

The lipid micro-encapsulation process is based on years of research in liposomal technology. The result is NUTRASPRAY, a proprietary system to deliver nutrients in the most efficient manner. This sublingual oral spray is a liquid suspension of liposomes, which are nutrients encased in very complex microscopic lipid spheres, 1/50th the diameter of a human hair. A highly purified natural lecithin forms the membrane of these lipid spheres, which are able to move easily through the lipid environment surrounding the capillaries in the mouth. Liposomes then gradually release their nutrients into bloodstream.

### Nutrients That Go To Your Head

The Source Naturals NUTRASPRAY line includes natural supplements that are particularly well-suited to this Super Sublingual delivery system, such as Melatonin, Ginkgo Biloba, Coenzyme Q10, Grape Seed extract, and Kava. That's because these nutrients need to reach the brain for maximum benefit. Also, they're usually taken for reasons that the fast-acting quality of NUTRASPRAY satisfies.

Another unique reason NUTRASPRAY is so bioavailable is that its nutrients bypass the liver on their first pass through the circulatory system. This ensures the nutrient is available to the brain for maximum potency.

Source Naturals NUTRASPRAY MELATONIN delivers 1.5 mg of the finest quality Melatonin with each full spray, easily allowing customers to control their intake. Melatonin is ideally suited to the fast-acting nature of NUTRASPRAY, which maintains a more balanced release of Melatonin throughout the night.

Source Naturals NutraSpray GINKGO-24™ provides 60 mg of Ginkgo Biloba per full spray. This makes Ginkgo's beneficial constituents readily available to the capillaries in the blood-brain barrier, facilitating oxygen flow to the brain.

CoQ10 is fat soluble; therefore encapsulating it in a lipid is the perfect way to ensure its bioavailability. Each full spray of Source Naturals NUTRASPRAY™ CoQ10 yields 30 mg of CoQ10. Furthermore, this popular metabolic enhancer is very experiential with the NUTRASPRAY delivery system.

NUTRASPRAY GRAPE SEED extract delivers 50 mg per spray of *proanthocyanidins* standardized to 95%. These highly bioavailable flavonoids are able to cross the blood-brain barrier, offering potent antioxidant protection to precious neurons.

NUTRASPRAY KAVA KAVA is a potent extract standardized to a potent 40% *kavalactones*, the active constituents of this traditional root from the Polynesian cultures of the South Pacific. The relaxing action of Kava works through the brain's limbic system, which regulates emotions related to survival issues, including the "fight or flight" response. Each spray yields 60 mg of Kava.

Look for other fine products soon to come out in the Source Naturals line of NUTRASPRAYS.

Source Naturals built its reputation on bringing the latest nutritional research to market, using the finest ingredients in substantial quantities – for an experience of wellness and vitality you can feel. Source Naturals NUTRASPRAY is a major step toward empowering people to achieve optimal health in a challenging world.
