

# High Quality Yaeyama Chlorella from Japan!

**C**hlorella is a highly nutritious green food, packed with nutrients that support the immune system and promote energy, vitality, and natural cleansing. But chlorella's tough cellulose wall makes absorption of its wonderful nutrients difficult.

Now Source Naturals offers you YAEYAMA CHLORELLA. Yaeyama, a pioneer in chlorella cultivation, uses a special spray-dry process that breaks the chlorella cell wall, yet preserves the nutrients within, ensuring a highly digestible and nutrient-rich product.

## Powerful Green Nutrition

Chlorella are green, single-cell microalgae that flourish in fresh water ponds and lakes worldwide. These plants are so tiny they must be seen under a microscope, yet they are a powerhouse of essential health nutrients.

Though chlorella is one of the oldest life forms on the planet, it was not until the early 1950's that serious work began in Japan to harvest its nutritional potential. Since then it has become one of Japan's most popular food supplements.

## Chlorella's Nutritional Benefits

Through the process of photosynthesis, chlorella uses the energy of sunlight to produce healthful chlorophyll at greater concentrations than any other known plant on earth. Chlorophyll has often been termed "nature's healer." Its effectiveness in detoxification, blood building and cellular protection have been recognized by numerous practitioners and researchers. While chlorophyll is present in every plant, chlorella is the richest known source.

Chlorella is a rich source of protein and includes all the amino acids essential to human nutrition.

YAEYAMA CHLORELLA in particular is about 2/3 protein. This makes it an important food for vegetarians.

Chlorella also supplies chlorella growth factor (CGF), a special growth factor found to be rich in DNA and believed to support cellular health and function. Chlorella also contains vitamins, minerals, and the antioxidant beta carotene in a complex of mixed carotenoids.

Chlorella may support the immune system and promote energy, vitality, and natural cleansing.

## Renowned YAEYAMA CHLORELLA

The Yaeyama company is known the world over for its 100% fresh-water chlorella, grown on the coral reef island of Ishigaki, Japan. The special spray-dry process used by Yaeyama results in some of the highest quality, most digestible chlorella on the market.

YAEYAMA CHLORELLA is rigorously tested by the Japanese government and independent laboratories—and it contains absolutely no added binders, fillers, or flow agents.

Source Naturals YAEYAMA CHLORELLA is available in 200 mg tablets and in powder form.
