

EczeMate®

Soothing Ointment for Satin Skin

Dr. Andrei Nedostupenko, a Russian heart surgeon, found that his hands were irritated by the constant washing he had to do prior to surgeries. Then he remembered hearing about a distant relative's recipe—a skin ointment unknown outside a small town in Russia. He tried it and the results amazed him. As a doctor, he wasn't content to just enjoy his newly-replenished skin; he began extensive investigations to discover the oint-

ment's secrets. After years of clinical trials, and great success, he is now bringing this formula to North America.

Source Naturals is pleased to bring you ECZEMATE, an amazing, replenishing formula from Russia. Made with natural ingredients free of pollutants, petrochemicals, or hazardous substances, it soothes, lubricates, and rejuvenates the skin.

Strategies for Wellness SM

From Russia?

Russia might not be the first place that comes to mind when imagining the source of a secret remedy for smooth, silky, supple skin, but in many ways it makes sense. With centuries of hard physical labor, intensely cold, bitter winters, and until recently, little access to the famous skin treatment centers of Europe or to modern cosmetics, who better than the Russians to appreciate a soothing cream that replenishes skin cells?

Natural Ingredients

The ingredients of ECZEMATE are natural ingredients that could be found in many farms and forests worldwide: beeswax, animal fats, fatty acids, rose hips, vitamin C, and carotenoids. The harvesting of many of these ingredients follows centuries-old folk traditions, the local knowledge of when certain plants reach their highest peak of potency. The secret to the ointment is the combination of the ingredients in a particular order at particular times, temperatures, and conditions.

Potent Herbs

ECZEMATE is a revitalizing and soothing ointment. One of the ingredients, rose hip oil, is a rich source of vitamins A, C and E, flavanoids, and other bio-active compounds, as well as essential fatty acids, including the Omega 3 group. It is thought that because the components of rose hip oil are so similar to those of skin cell membranes, that is why this oil has such powerful regenerative effects on skin cells. Composed of oleic (15-20%), linoleic (44-50%) and linolenic (30-35%) fatty acids, this amazing oil has been used effectively in worldwide skin tests.

Part of a Complete Skin Care Plan

For healthy skin in general, researchers recommend using zinc to support the immune system. Drink plenty of water, increase your intake of dark, leafy greens like kale and chard—both non-dairy sources of calcium—and make sure you are getting sufficient vitamin C. Avoid refined sugar, and replace animal products with fatty fish, such as salmon, herring, halibut and mackerel, to provide essential fatty acids.

Source Naturals is pleased to bring you ECZEMATE, an easy-to-use topical ointment that has had tremendous success in supporting smooth, healthy, silky skin. Unlike many skin formulas, it is made with natural products; it contains no corticosteroids, hydrocortisone, nor paraffin. Use it as part of your own wellness program, taking charge of your own health and well-being in the wellness revolution.
