FOR IMMEDIATE RELEASE

SOURCE NATURALS INTRODUCES OLIGONOL®

EXOTIC, POTENT ANTIOXIDANT

Scotts Valley, California - The court herbalists and sages of the ancient Chinese emperors knew the secrets of healthy aging; now those secrets have been re-discovered. Oligonol® combines the nutrients from lychee fruit and green tea for a powerful antioxidant.

Lychee fruit and green tea have long been staples of traditional Chinese health practices, and now those benefits are confirmed by modern research. Green tea has long received worldwide acclaim for its health properties, now the lychee fruit, a small, white opalescent fruit encased in a red shell, is being re-discovered for its phenomenal antioxidant properties.

Source Naturals spokesman Tony Lucchesi says, “Lychee fruit has robust polyphenols such as: catechin, epicatechin and many other procyanidins. Green tea contains the potent polyphenols, EGCG (epigallocatechin gallate) and ECG (epigallocatechin). EGCG has been shown to be an effective antioxidant that supports cardiovascular health, dental health, and a healthy metabolism.”

In Oligonol, the active polyphenols of both lychee and green tea are processed into smaller molecules known as oligomers. This unique processing makes the nutrients more bioavailable; they are more quickly absorbed and effective for increased antioxidant activity, protecting the cells from free radicals and oxidation, for inhibition of lipid peroxidation, and for improved circulation and energy, all to help support healthy aging.

Source Naturals is committed to enhancing individual potential to enjoy optimal health and well being by providing superior quality dietary supplements and nutritional education. For more information or purchase locations, please visit <http://www.sourcenaturals.com>.
