Source Naturals Introduces Amino-Muscle™

Branched-Chain Amino Acid Complex

Scotts Valley, CA - Research has shown that three specific essential amino acids-leucine, isoleucine, and valine-have unique metabolic properties that directly activate muscle health and development. Source Naturals has harnessed the power of these 'branched-chain' amino acids in our new muscle formula, **Amino-Muscle™**.

Threshold Enterprises, Ltd. Spokesperson Tony Lucchesi says, "The branched-chain amino acids are essential for the maintenance of healthy muscle tissue, and may also prevent muscle breakdown during exercise by preserving vital glycogen stores. Unlike other amino acids, the branched-chained amino acids are metabolized directly in the skeletal muscle, giving direct support to the highest-stress areas during exercise."

Source Naturals **Amino-Muscle™** formula is also enhanced with the addition of vitamins B6 and B12 for optimal protein synthesis and the management of healthy cellular metabolism.

Source Naturals is committed to enhancing individual potential to enjoy optimal health and well being by providing superior quality dietary supplements and nutritional education. For more information or purchase locations, please visit <http://www.sourcenaturals.com>.
