Source Naturals Introduces ChocoLift™

Chocamine® Plus Cocoa Extract for Positive Energy

Scotts Valley, CA – Source Naturals is pleased to introduce ChocoLift™, which contains Chocamine® Plus, a proprietary cocoa extract blend. This is available in a convenient 500 mg capsule.

Source Naturals spokesperson Tony Lucchesi says, “cocoa contains highly beneficial polyphenol flavonoids, and our product is standardized to 5% polyphenols for antioxidant defense. The polyphenolic compounds in cocoa are shown in scientific studies to exhibit robust free radical scavenging activities. ChocoLift™ is a great alternative to the overabundance of sugar-laden energy products available in convenience stores.”

Cacao was first utilized over 2,000 years ago by indigenous cultures from Southern Mexico and Central America where it was known as the “food of the gods.” Spanish explorers brought it to Europe where the cacao beans were mixed with sugar and spices and offered as a hot energy drink.

Lucchesi continues, “ChocoLift™ contains theobromine standardized to 12% for energy support and small amounts of naturally occurring caffeine. These alkaloids are readily absorbed in the stomach and intestines, and they quickly cross the blood brain barrier. Theobromine in chocolate has been studied for its support of increased energy, mental acuity, and cognitive function.”

Source Naturals ChocoLift™ supports 3 of the 12 deep metabolic systems identified by Source Naturals as key to your wellness. These are: Energy, Cognition/Nerves, and Antioxidant Defense.

Source Naturals is committed to enhancing individual potential to enjoy optimal health and well-being by providing superior quality dietary supplements and nutritional education. For more information or purchase locations, please visit <http://www.sourcenaturals.com>.
