SOURCE NATURALS INTRODUCES EUROPURE™ SILYMARIN

Scotts Valley, CA – December 22, 2008 - Source Naturals is pleased to introduce EuroPure Silymarin, which contains a high quality European milk thistle extract. Silymarin is shown in many scientific studies to support healthy liver function and is available from Source Naturals in a convenient capsule form.

Source Naturals National Science Educator Guy Devin, Ph.D. says, "The liver is a powerhouse organ performing many key functions in the body. The liver activates vitamins and produces enzyme antioxidants and cholesterol, which maintained at normal levels, is responsible for brain health and cell membrane integrity. The liver is also responsible for detoxifying and eliminating chemicals and bodily produced waste products."

Source Naturals EuroPure Silymarin supports three of the twelve deep metabolic systems identified by Source Naturals, which are critical for your health. These categories are: Cells/DNA, Antioxidant Defense and Liver Detoxification.

According to Devin, "Studies have shown that silymarin may support healthy liver function through stabilizing cell membranes and through supporting healthy bile flow. Silymarin also works as a free radical scavenger to support the body's own antioxidant defense system."

The liver is responsible for detoxifying and eliminating thousands of man-made and environmental toxic chemicals and pollutants from our body. With this unprecedented assault on our system, it's imperative that we give the liver plenty of support so that it can perform its many important functions.
