

SWEDISH FLOWER POLLEN EXTRACT

Supports a Healthy Prostate Gland!

Source Naturals is proud to introduce SWEDISH FLOWER POLLEN EXTRACT, a standardized extract used extensively throughout Europe and Asia for more than 40 years. SWEDISH FLOWER POLLEN EXTRACT has been clinically shown to support prostate gland functioning and healthy urine flow—but its potential uses are much broader in range.

Research has revealed many health benefits of SWEDISH FLOWER POLLEN EXTRACT, including antioxidant defense, regulation of cell metabolism, liver protection, lipid regulation, immune support, and muscular support during exercise.

Unique Pollen Extract

Flower pollen is the male seed of flowers necessary for flowering plants to reproduce. Source Naturals SWEDISH FLOWER POLLEN EXTRACT is a concentrated flower pollen extract, derived from a mix of flowering plants. SWEDISH FLOWER POLLEN EXTRACT is *not* bee pollen—it is a proprietary blend of pollens gathered directly from flowers. Recent research has confirmed its usefulness in supporting health and vitality in humans.

Source Naturals SWEDISH FLOWER POLLEN EXTRACT consists of specific, controlled amounts of two fractions of flower pollen extract: a water-soluble fraction and a fat-soluble fraction. This extract is produced using a process that renders it free of allergens.

Prostate Support/Cell Regeneration: Source Naturals SWEDISH FLOWER POLLEN EXTRACT is the same extract shown in a number of clinical studies to be beneficial for the prostate, and specifically for promoting healthy urine flow. In vitro research has found that the fat-soluble fraction of Swedish flower pollen extract inhibits the metabolism of arachidonic acid and influences prostaglandin synthesis, which may be associated with comfort levels. In addition, the water-soluble fraction was found in one preliminary in vitro study to influence prostate cell metabolism and regeneration.

Antioxidant Defense/Immune Regulation: In vitro and animal studies have demonstrated that Swedish flower pollen has antioxidant and immune regulatory properties.

Liver Protection: In numerous studies on animals exposed to toxins, Swedish flower pollen has demonstrated liver protective properties. Swedish flower pollen helped to maintain healthy biochemical and physical parameters of the liver.

Smooth Muscle Relaxation: Animal research shows that the action of Swedish flower pollen may involve smooth muscle relaxation of the bladder, prostate and urethra.

Lipid Regulation: Studies have shown that Swedish flower pollen has lipid and cholesterol regulating properties in animals and humans.

Clinical Dosage

The suggested daily use of Source Naturals SWEDISH FLOWER POLLEN EXTRACT supplies 378 mg of pollen extract, standardized to contain a minimum of 1.4% alpha amino acids and 0.8% phytosterols. Taken as directed, SWEDISH FLOWER POLLEN EXTRACT provides the same potency of standardized extract used in recent prostate health studies.

The Word Is Out

Despite its widespread use in Europe and Asia, Swedish flower pollen extract has until recently been relatively unknown in the United States. However, recent prostate health books have spread the knowledge of this remarkable botanical to the American public.

Source Naturals makes SWEDISH FLOWER POLLEN EXTRACT available to you in bottles of 45 and 90 tablets. For added prostate protection, Source Naturals offers you PROSTA-RESPONSE™, a comprehensive formula that combines Swedish flower pollen with additional prostate-friendly herbs and nutrients.
