FOR IMMEDIATE RELEASE

SOURCE NATURALS INTRODUCES NOPAL ENDURANCE WITH Tex-OE™

A PRICKLY PEAR EXTRACT FOR ENDURANCE AND STAMINA

Scotts Valley, California— Source Naturals is proud to present **Nopal Endurance**, a natural way to increase endurance and recover from muscle fatigue. Source Naturals researchers are introducing a nutritious fruit, developed in nature, which can enhance athletic performance and facilitate safe recovery after exercise.

Threshold Enterprises, Ltd. spokesperson Todd Williams has this to say: “Whether you’re a professional athlete, a weekend warrior, or you just like to keep fit with regular exercise, your body needs support to maintain performance.”

Source Naturals **Nopal Endurance** contains Tex-OE™, a patented standardized extract from the prickly pear, or nopal cactus, that helps support endurance and stamina through priming the body for athletic activity and physical endurance. Preliminary evidence suggests that Tex-OE™ may support the accelerated formation of Heat Shock Proteins (HSPs), stress recovery proteins synthesized by the body to endure physiological extremes.

Spokesperson Todd Williams also notes that Nopal Endurance supports key Wellness metabolic systems – The IMMUNE SYSTEM, through quick action; CELLULAR IRRITATION, by targeting cellular rehabilitation; and SUGAR METABOLISM and MITOCHONDRIAL ENERGY, through support of glucose metabolism.

Source Naturals is committed to enhancing individual potential to enjoy optimal health and well being by providing superior quality dietary supplements and nutritional education. For more information or purchase locations, please visit <http://www.sourcenaturals.com>.
