

SKIN ETERNAL™ HYALURONIC ACID TABLETS & SERUM

Replenish Your Skin Inside and Out

Fine lines and sagging are symptoms of skin cells that have lost elasticity and moisture, a natural result of aging. But you can replenish aging skin cells internally by adding Source Naturals SKIN ETERNAL HYALURONIC ACID to your skin care regimen today.

Hyaluronic acid, one of the most important building blocks for taut, firm skin, retains moisture

for a dewy complexion. SKIN ETERNAL HYALURONIC ACID provides the latest scientific breakthrough in anti-aging nutrients. It is made from patented BioCell Collagen II® and processed into smaller segments for better absorption. This hydrolyzed type II collagen also provides hyaluronic acid and chondroitin sulfate to moisturize and replenish aging skin.

Anti-Aging Skin Nutrients

Hyaluronic acid is a vital component of skin. It provides a firm structure that holds moisture in for smoothness and elasticity. During aging, hyaluronic acid levels decline, affecting the look and health of skin, but they can be replenished. SKIN ETERNAL HYALURONIC ACID from patented BioCell Collagen II® is scientifically formulated from 100% pure cartilage and has been awarded a U.S. patent for support of connective tissue, joints and cartilage. SKIN ETERNAL HYALURONIC ACID is processed to contain smaller, more bioavailable molecules of hyaluronic acid. This results in a higher-quality product, because larger molecules are difficult for the body to absorb, making them less effective. SKIN ETERNAL HYALURONIC ACID supports healthy skin production to improve elasticity and reduce the appearance of wrinkles. This breakthrough anti-aging formula contains collagen, hyaluronic acid and chondroitin sulfate to replenish aging skin from within.

Replenish with Hyaluronic Acid

Scientists have studied hyaluronic acid for over 40 years. It is found throughout our bodies and is concentrated in our skin and joint cells. It is a glycosaminoglycan (GAG) that acts like a sponge to hold water in its strong matrix, keeping skin cells firm and smooth. As we age, hyaluronic acid levels decline – but supplementation can help increase hyaluronic acid levels. Hyaluronic acid can be used to strengthen the area around collagen, the most important structural component of skin. This replenished structure can tone and moisturize, pulling

your skin tight and smooth over a strong foundation. The result: greater elasticity and reduced appearance of wrinkles.

Chondroitin for Added Support

Chondroitin sulfate is also a GAG (glycosaminoglycan) that provides structure and retains lubricating moisture in the joint matrix. In research studies, chondroitin supplementation promotes joint health by supporting the body's own repair process.

Also Available : Skin Eternal Hyaluronic Serum

One to two times daily, place 1-4 drops of serum on your finger and gently massage into the desired area of your face, hands, neck, or other skin areas.

- Hyaluronic acid (HA) features one of the most important building blocks for firm skin. It retains moisture in its sponge-like matrix for smooth, supple and elastic skin.
- SKIN ETERNAL HA SERUM also contains vitamin C ester, DMAE, CoQ10, and more to leave your skin soft and replenished.
- SKIN ETERNAL HA SERUM is combined with ingredients that retain moisture and keep the skin tight and smooth.

Hyaluronic acid, in tablets and serum, helps you achieve your goal of having radiant, young looking skin.
